

March, 2007

INEOS Nitriles is pleased to invite you and other members of your company to the Worldwide Nitriles Safety Seminar for the year 2007. This year's seminar will be held on Tuesday 12 and Wednesday 13 June, at our Worringen plant site in the Köln area in Germany. As the leading Nitriles (acrylonitrile and acetonitrile) producer in the world, INEOS Nitriles tries to keep you informed of the latest health, safety and environmental issues facing all of us in the industry today. The objective of this seminar is to try to enhance your knowledge by providing comprehensive and up-to-date information. Recent industry developments make this year's program a must for members of Health, Safety and Environmental departments; in particular development of REACH by the European Union authorities will be reviewed. Updates of storage, handling and emergency response topics will also be featured for individuals involved in the operational issues of your manufacturing facilities.

The seminar will consist of two full days of theory, visuals, and presentations by acknowledged industry experts. The agenda will also include some parallel sessions on Acrylonitrile, Acetonitrile and Logistics to allow participants to focus their attention on topics of particular interest. Delegates will be given the possibility to have a tour of the Acrylonitrile plant and attend specific on-site demonstrations. A copy of the agenda will be sent to all registrants as soon as available.

Participants should plan to arrive on Tuesday 12 June at 8 am at the plant, in time to go through plant check-in formalities so that the program starts at 9 am sharp. In addition to sponsoring the seminar, INEOS will invite delegates for a dinner on Tuesday 12 June. Delegates will have to make their own arrangements for transportation and hotel booking; a list of hotels in the area is attached to this letter.

Please distribute this announcement as appropriate to individuals within your organization who might benefit from attending this seminar so they might reserve this time on their calendar. Space will be limited and will be available on a "first come first serve basis." For your convenience, please use the attached form to register. Completed registration forms and all follow-up communications and/or special requirements should be directed to Daniela Juesten by 15 April 2007. Additional information will be sent directly to seminar participants by 1 June 2007.

We look forward to hosting the key individuals who represent our strategic Nitriles customers from around the world.

Best regards,

Amin Dhalla
Business Director
INEOS Nitriles
